

Click-Counting: Wegovy and Ozempic (AKA Semaglutide)

What is Click-Counting?
Click-counting is an off-label strategy to achieve doses between pen dose markings

Why Use it?
Click-counting may be useful for patients who cannot tolerate full dose increases due to side effects and could also allow for cost savings (see “Cost Navigation” handout)

How to Use it?
Click counting on a semaglutide pen involves turning the dose selector a specific number of clicks to deliver a dose between the pen’s marked dose increments

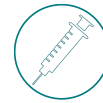

After first use

The pen is stable for 8 weeks at room temperature, although it is safer if kept in the refrigerator between injections. You can safely use up to 8 doses with 1 pen.

To minimize contamination:

Wash hands before each injection

Use new needle cap each injection

Discard pen needle after injection

Store pen in refrigerator
